## Improve product consistency and quality

Metroweigh Limited specialises in providing high quality weighing solutions and in-line inspection systems for the food, pharmaceutical and freight forwarding industries.

Founded 40 years ago, we have used our vast experience, research and development to create a wide range of stainless steel scales up to IP69k protection, for use in hygienically sensitive areas.

Our user friendly software solutions for the food manufacturing and logistics industries are tailored specifically to meet your company requirements.

They are designed to help your business adhere to due diligence rules whilst also observing and operating within accordance of average weight legislation.

The airline catering weigh station has been developed in conjunction with one of the world's leading airline meal providers to improve product consistency and quality whilst improving giveaway and productivity.
